OVERVIEW OF TEXTBOOK SURVEY

PERFORMANCE OF THE ECONOMY

CONSUMER PRICE INDEX AND INFLATION

The analysis of the Consumer Affairs Commission (CAC) Annual Textbook Survey must be interpreted bearing in mind the trends in the local and global economy which impact the pricing and availability of these textbooks. Among these are the trends in inflation and the movement in foreign exchange rate.

The latest data from the Statistical Institute of Jamaica on inflation indicate that the Point-to-Point inflation rate for the period July 2016 - July 2017 was 4.4%¹.

FOREIGN EXCHANGE

Since the last survey in July 2016, the Jamaican dollar has undergone continual depreciation against its major counterparts². It has lost 2% of its value when compared to the US Dollar moving from a rate of J\$126.38: US\$1.00 to J\$128.34: US\$1.00. In comparison to the British Pound, the Jamaican Dollar lost 1% of its value, moving from a rate of J\$165.52: GBP £1.00 to J\$166.42: GBP £1.00.

THE SURVEY

This year's annual textbook survey was conducted by the Consumer Affairs Commission (CAC) between July 24 and August 2 2017. The aim of the survey was to:

1. Provide consumers with information that would assist them to cost effectively discharge their responsibilities as parents/guardians;
2. And to present researched evidence concerning textbooks as critical consumer items;

Price and availability data on 133 popular textbooks were obtained from 95 retailers Island-wide: 30 bookstores in the Greater Kingston Metropolitan Area (Kingston, St. Andrew, Portmore and Spanish Town) and 65 from Other Urban and Rural Towns of the other parishes including St. Catherine. The books surveyed consisted of ninety (90) secondary level, thirty (30) primary level and thirteen (13) infant level textbooks covering seventeen subject areas.

2.3 METHODOLOGY

In 2014, the Ministry of Education instituted a new textbook policy which has greatly reduced the number of books parents were required to purchase for their children. This policy remains in effect and the books which they will be asked to purchase should adhere to the rubric outlined in Table 1.

TABLE 1 MOE’S SUGGESTIONS REGARDING THE TYPE OF BOOKS TO APPROVED FOR PURCHASE BY PARENTS

Grade Level	Types of Books
1-3	No more than three (3) supplementary texts including a reader
4-6	Only workbooks for Language Arts, Mathematics, Social Studies and Science
7-9	Only literature books and the corresponding workbook for each of subject area being provisioned by the Ministry
10-11	Textbooks for subjects which the Ministry of Education does not provide. These include Literature ³ and Cosmetology

In keeping with the Ministry’s principle of school-based management, schools were required to select the supplementary textbooks they deemed most suitable for their students from the most current Supplementary Textbook Lists provided by the Ministry. The schools submitted their booklists to the MOE for approval. The booklists submitted by schools to the Ministry of Education, Youth, and Information were supplied to the CAC for review. The most widely requested books were included in the list of books for observation. Books selected also had to meet Ministry guidelines. Once a draft survey instrument was designed it was submitted to the Ministry to ensure that the texts selected were in line with their purchasing suggestions as well. **A total of 133 books were selected for observation: 13 infant school texts; 30 primary school texts; and 90 high school texts.**

The CAC’s survey officers were provided with a list of the books along with their respective International Standard Book Number (ISBN)⁴ and specific information to facilitate the correct identification of the version of the book being surveyed. Data was captured and submitted using SurveytoGo, a mobile data collection application. The CAC staff reviewed the prices and confirmed selected book prices with retailers.

ANALYSIS

Data analysis involved the calculation of the average⁵, maximum and minimum price for each text book as well as coefficients of variation and availability. Availability refers to the number of stores that had the textbook in stock at the time of the survey. Thus the term ‘readily

³ A Bulletin issued by the MOEYI on June 30, 2017 stated that the Ministry will now supply PATH students in grades 7, 10 and 11 with their Literature Texts under the National Textbook Loan Scheme (MOEY&I Bulletin - 100/2017)

⁴ International Standard Book Number (ISBN) is a 10 or 13-digit number identifies a specific book, an edition of a book, or a book-like product (such as an audiobook).

⁵ Arithmetic mean

available' signifies that the book was found in at least 50% of the bookstores surveyed. The coefficient of variation⁶ (COV) measures the percentage deviation of the prices from their mean. It showed the level of dispersion of prices for each textbook across bookshops. The unit-less nature of the coefficient of variation made it possible to compare price dispersions among bookshops. The report also utilized an overall average⁷ which was calculated as the average of averages within certain categories of books. The overall highest and lowest average prices were noted for reporting purposes.

2.4 LIMITATIONS

Essentially, limitations in resources- money, man-power and time- meant that the volume of texts to be surveyed needed to be somewhat representative but still at a manageable level. The CAC's methodology involves selecting the most popularly requested text based on a review of the booklists of the schools. Furthermore, the texts should fall within the guidelines of the Ministry. This means that certain popular additional texts may have been excluded from the sample, although they are not prohibited by the Ministry. The selection of CSEC/CAPE texts was limited as schools do not have to submit these for review by the Ministry, and there was no guidance on what may be requested. The CAC was thus resigned to carrying forward texts used for popular subjects.

In keeping with the CAC's mandate, consumers need to be advised of the prices in the market so that they may discharge their responsibilities in an informed manner. This necessitated conducting the survey before the majority of parents began their back to school purchasing. Although many observations were made in the field, it must be noted that the ideal availability of books cannot be measured. Some stores were in the process of restocking during the survey which could explain the low availability levels observed for some texts.

⁶ This is calculated using the formula $\frac{SD}{M}$ where SD is the standard deviation of the distribution of prices for the text, and M is the arithmetic mean of the distribution of prices for that text.

⁷ Arithmetic mean

PUBLICATION FACTORS AND PRICE VARIATION

There are several factors which could account for price dispersion among outlets. Some of these factors originate with the publisher and could include:

- a) Book Design
 - ✓ Illustrative component (e.g. colour vs. black & white)
 - ✓ Method of binding (e.g. cased sewn vs. spiral bound)
 - ✓ Quality of paper
 - ✓ Type of cover (e.g. hard cover vs. paperback)
- b) Print Quantity
 - ✓ This determines unit production costs
- c) Print Centre
 - ✓ Some of the Print Centres are located in China, India and Singapore
- ✓ They utilize more modern technologies and tend to be more economical
- d) Edition
 - ✓ Reprint vs. new edition.
- e) Fluctuations in Exchange Rates
 - ✓ Over time
 - ✓ This may be further complicated by dollar versus sterling sources.
- f) The retailer may also introduce
 - ✓ Variations in cost of delivery
 - ✓ Bulk vs. special delivery
 - ✓ Variations in mark up

Overall

Overall, a 6% increase in textbook average prices was observed island-wide for all texts, compared to inflation of 4%. However, the average price of the majority of texts increased between 0% and 10%, with some showing reduction in average prices.
