OVERVIEW OF TEXTBOOK SURVEY

PERFORMANCE OF THE ECONOMY

CONSUMER PRICE INDEX AND INFLATION

The analysis of the Consumer Affairs Commission (CAC) Annual Textbook Survey must be interpreted bearing in mind the trends in the local and global economy which impact the pricing and availability of these textbooks. Among these are the rate of inflation and the movement in the foreign exchange rate.

The latest data from the Statistical Institute of Jamaica on inflation indicate that the Point-to-Point inflation rate for the period June 2017 - June 2018 was 2.8%¹.

FOREIGN EXCHANGE

Since the last survey in July 2017, the Jamaican dollar has undergone fluctuations against its major counterparts². It has lost 3% of its value when compared to the US Dollar moving from a monthly average rate of J\$128.34: US\$1.00 to J\$132.25: US\$1.00. In comparison to the British Pound, the Jamaican Dollar lost 4% of its value, moving from a monthly average rate of J\$166.34: GBP £1.00 to J\$173.71: GBP £1.00.

THE SURVEY

This year's annual textbook survey was conducted by the Consumer Affairs Commission (CAC) between July 23 and July 27, 2018. The survey aims to:

1. Provide consumers with information that would assist them to cost effectively discharge their responsibilities as parents/guardians; and
2. Present researched evidence concerning textbooks as critical consumer items.

Price and availability data were obtained from 90 retailers Island-wide: 26 bookstores in the Greater Kingston Metropolitan Area (Kingston, St. Andrew, Portmore and Spanish Town) and 64 from Other Urban and Rural Towns of all the parishes including St. Catherine. A total of 133 popular textbooks were surveyed, consisting of ninety (90) secondary level, thirty (30) primary level and thirteen (13) infant level textbooks covering seventeen subject areas.

2.3 METHODOLOGY

In 2014, the Ministry of Education instituted a new textbook policy which has greatly reduced the number of books parents were required to purchase for their children. This policy remains in effect and the books which they will be asked to purchase should adhere to the rubric outlined in Table 1.

TABLE 1 MOE’S SUGGESTIONS REGARDING THE TYPE OF BOOKS APPROVED FOR PURCHASE BY PARENTS

Grade Level	Types of Books
1-3	No more than three (3) supplementary texts including a reader
4-6	Only workbooks for Language Arts, Mathematics, Social Studies and Science
7-9	Only literature books and the corresponding workbook for each of subject area being provisioned by the Ministry
10-11	Textbooks for subjects which the Ministry of Education does not provide. These include Literature ³ and Cosmetology

In keeping with the Ministry’s principle of school-based management, schools were required to select and submit for approval the supplementary textbooks they deemed most suitable for their students. These were selected from the most current Supplementary Textbook Lists provided by the Ministry. The approved booklists were analysed by the CAC following which, the most widely requested books were included in the list of books to be surveyed. Once a draft survey instrument was designed it was submitted to the Ministry to ensure that the texts selected were in line with their purchasing guidelines as well.

The CAC’s survey officers were provided with a list of the books along with their respective International Standard Book Number (ISBN)⁴ and specific information to facilitate the correct identification of the book being surveyed. Data was captured and submitted using SurveytoGo, a mobile data collection application. The CAC staff reviewed the prices and confirmed selected book prices with retailers.

ANALYSIS

Data analysis involved the calculation of the average⁵, maximum and minimum price for each text book as well as availability. Availability refers to the number of stores that had the textbook in stock at the time of the survey. Thus the term ‘readily available’ signifies that the book was found in at least 50% of the bookstores surveyed.

³ A Bulletin issued by the MOEYI on June 30, 2017 stated that the Ministry will now supply PATH students in grades 7, 10 and 11 with their Literature Texts under the National Textbook Loan Scheme (MOEY&I Bulletin - 100/2017)

⁴ International Standard Book Number (ISBN) is a 10 or 13-digit number identifies a specific book, an edition of a book, or a book-like product (such as an audiobook).

⁵ Arithmetic mean

2.4 LIMITATIONS

Essentially, limitations in resources- money, man-power and time- meant that the number of texts to be surveyed needed to be representative yet at a manageable level. The CAC's methodology involves selecting the most popularly requested text based on a review of the booklists of the schools. Furthermore, the texts should fall within the guidelines of the Ministry. This means that certain popular additional texts may have been excluded from the sample, although they are not prohibited by the Ministry. The selection of CSEC/CAPE texts was limited as schools do not have to submit these for review by the Ministry, and there was no guidance on what may be requested. Consequently, the CAC carried forward texts used in previous years.

In keeping with the CAC's mandate, consumers need to be advised of the prices in the market so that they may discharge their responsibilities in an informed manner. Therefore, the Commission sought to conduct the survey and provide the findings to parents before they began their back to school purchasing. Although many observations were made in the field, it must be noted that the ideal availability of books cannot be measured. Some stores were in the process of restocking during the survey period which could explain the low availability levels observed for some texts.

During the period of data collection, it was noted that all stores do not restock at the same time. As such, some outlets had not completed their restocking exercise and consequently, had not adjusted the price of some texts in line with new purchases. These "old stock" prices can impact the price variation among texts and explain the lower than anticipated average price changes.

PUBLICATION FACTORS AND PRICE VARIATION

There are several factors which could account for price dispersion among outlets. Some of these factors originate with the publisher and could include:

- | | |
|---|--|
| a) Book Design | ✓ They utilize more modern technologies and tend to be more economical |
| ✓ Illustrative component (e.g. colour vs. black & white) | |
| ✓ Method of binding (e.g. cased sewn vs. spiral bound) | d) Edition |
| ✓ Quality of paper | ✓ Reprint vs. new edition. |
| ✓ Type of cover (e.g. hard cover vs. paperback) | e) Fluctuations in Exchange Rates |
| | ✓ Over time |
| b) Print Quantity | ✓ This may be further complicated by dollar versus sterling sources. |
| ✓ This determines unit production costs | |
| c) Print Centre | f) The retailer may also introduce |
| ✓ Some of the Print Centres are located in China, India and Singapore | ✓ Variations in cost of delivery |
| | ✓ Bulk vs. special delivery |
| | ✓ Variations in mark up |

The presence of these factors impacts the books selected from price comparison across survey periods. If the CAC becomes aware of any difference in the books across survey periods, particularly in their ISBNs, a comparison in price is not made. Eleven such texts were identified during this survey
